Research Interests

- Trust as a result and function of dialog.
How do people:
 - Develop trust of information exchanged in a conversation?
 - Use trust to achieve their conversation goals?
 - Interpret trust differently across languages and cultures?
- Meaning of “trust”
 - Components of trust
 - Uses of trust

Unique Expertise

- One of world's leading research groups at intersection of spoken dialog systems and interaction design
- Multi-lingual team (English, Spanish, Arabic ...)
- CIFA-funded study of trust across cultures

- We seek to join a group able:
 - To leverage our domain and methodological expertise in communication and trust
 - To help us understand what knowledge and tools can be of most value to the intelligence community
 - To provide a technology-transfer path to transition them to practice
