

iNTIFIC Capabilities Briefing

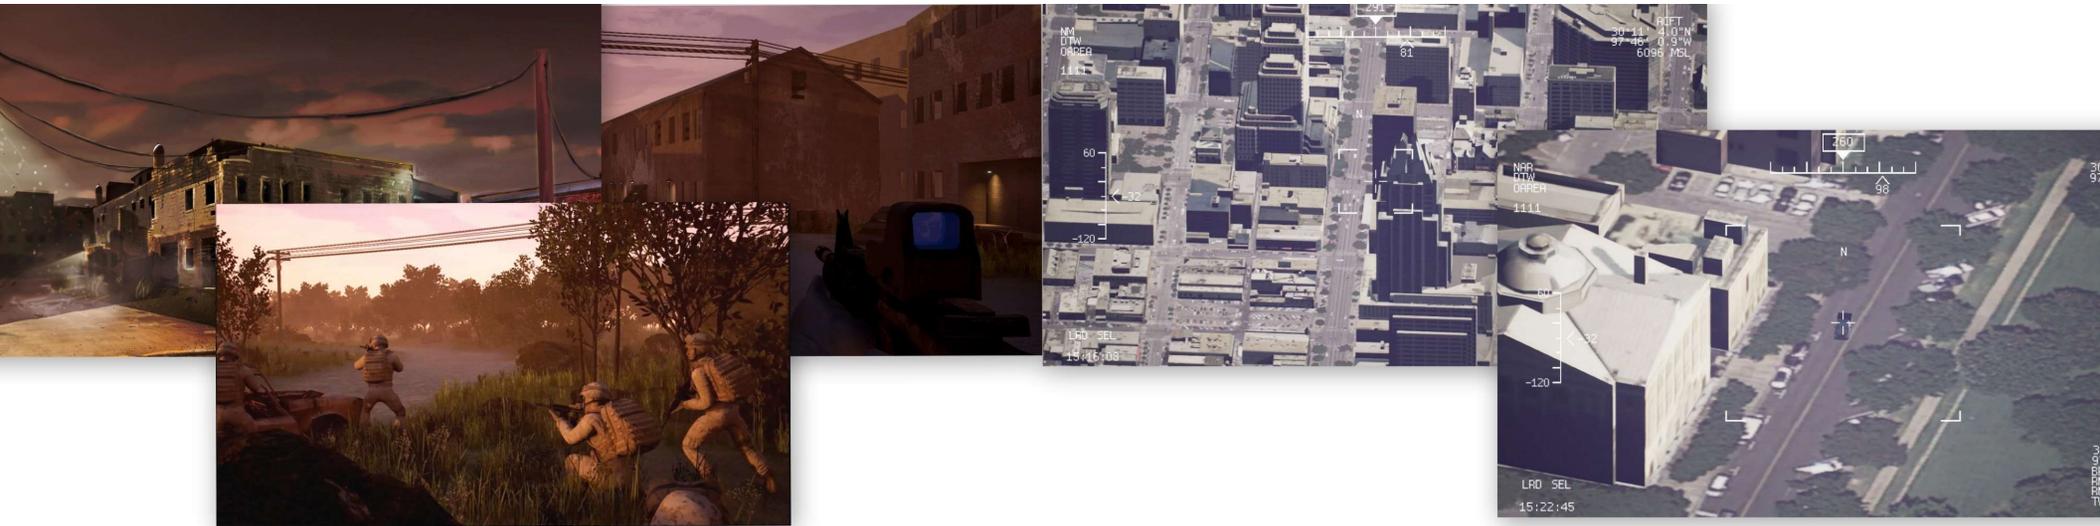

iARPA CORE3D Proposers Day Briefing

Michal Simek, msimek@intific.com 703-587-8851

Intific, Inc.

- *Lead Investigator:* Mr. Will McBurnett
- *Current team members:* None
- Software engineering company founded in 2003
 - Acquired by Cubic as a separate, wholly owned subsidiary in March 2014
- Intific has over 90 staff consisting of SMEs, Research Scientists, Software Designers, Programmers, Engineers and Artists
- Intific provides products and support to government, commercial, and academic clients
- Company locations
 - Engineering Studio - Austin, Texas
 - Washington Operations - Alexandria, Virginia

iNTIFIC research areas of interest & unique qualifications

Research areas of interest

- Multi-level/multi-modal data fusion
- Constructive Solid Geometry
- Geometric algebra scene generation
- Large data/architecture/integration

Unique Qualifications

- User interfaces and User Experience
- 3D synthetic ISR and virtual environment creation using game technology
- Physics based virtual testbed development for training and technology evaluation
- Educational game development
- Neuroscience

Seeking to join a research group & contact info

Our intent is not to be a prime

We would like to provide our 3D visualization capability to a technical research group
