

pulse Perfect Image Inc.

Smooth surface/CSG reconstruction via proprietary DNAX™ technology, voxel processing.

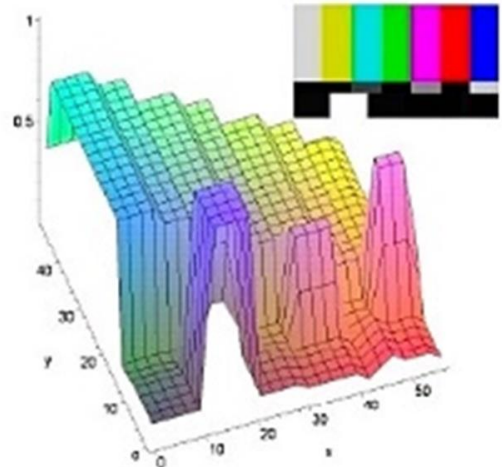

DNAX Smooth Surface Construction

Polygon-mesh Construction

Virtual Reality, Real-time 3-D rendering, Ray/Path tracing techniques, gesture recognition.

Inherent Antialiasing performance.

SMPTE Color Bar Signal represented By ONE SINGLE equation

Ability to do near real-time photorealistic 3-D rendering & object modeling. Application to gaming, film rendering, medical imaging, and mineral exploration.
