

**George Mason University**  
Volgenau School of Engineering  
C4I Center

Unique qualifications & abilities:

- Successfully developed and implemented an integrated crowdsourcing and reasoning engine (SciCast under IARPA ACE)
- Implemented a distributed cloud-based user interface for crowd-sourcing
- Developed and implemented real-time integration of crowd-sourced UI and back-end algorithms
- Deep experience with structured analytic techniques and probabilistic reasoning

Research areas of interest:

- Extend structured reasoning algorithms for crowd-sourced input
- Leverage crowd-sourced data to quantify reason and evidence credibility and diagnosticity
- Integrate modified algorithms with crowd-sourced data and interfaces

Seeking partners with additional experience using and applying structured analytic techniques (ACH and others)
