DIGITAL REPRESENTATION OF THE WORLD WITH PLATFORM BUILDING BLOCKS

Enterprise Challenges

Enterprises require fast data-driven insights and decision making to remain competitive, but complexity impedes the delivery of innovation and value-driving production workflows.

- Ubiquitous, massive, & siloed sensor/IoT data
- Human/machine friction slows productivity
- Complexity compromises speed-to-market

MapLarge Building Blocks

Empower enterprises to rapidly develop workflows with minimal or no code, removing complexity from development, while maintaining the benefits of a custom solution.

- Use Best-in-Class geospatial & IoT solutions
- Develop AI/automated apps with no coding
- Operationalize R&D efforts to production

Deliver Results:
MapLarge’s Building Block Architecture is Built for Solution Development
OPEN ARCHITECTURE FACILITATES INTEGRATION OF BEST PARTNER CAPABILITIES
USE CASE: GLOBAL SCALE MARITIME ACTIVITY PATTERNS

Multiple Feeds
100s of Billions of Records

Scalable Automated Processing
Anomaly Detection
Plugable Algorithms

Applications
Privacy Controls
Partner Integrations
