BAE SYSTEMS
INSPIRED WORK

ADVANCED ANALYTICS LAB

Technical Director: Don Widener
Project Manager: Matt Dykstra
Lead Analyst: Kyle Lewis

Seeking to Team

The BAE Systems Advanced Analytics Lab is a center of excellence for OSINT analysis, user-based engineering, and multidisciplinary analytic tradecraft. Past projects have supported Intelligence Community (IC) and commercial clients.

BAE SYSTEMS

INSPIRED WORK

Intelligence Analysis Experience

1200+ cleared intelligence analysts supporting DoD & IC missions in tasks such as I&W, Trend Analysis, Network Analysis and ABI

Transition Experience

We have transitioned numerous programs from research labs to operations, ensuring research is ops-relevant

Use Case and Scenario Development

We understand the issues facing IC & DoD agencies, and develop use cases and scenarios to fit those needs

User-Based Application Development

We build and integrate flexible, lightweight applications to support data collection, ingest, processing, visualization, analysis and export for further exploitation

BAE SYSTEMS
INSPIRED WORK

Innovative and dynamic team looking to leverage our operational expertise to support research and development addressing emerging intelligence requirements
