# Rensselaer Polytechnic Institute

## Capabilities:

- Multi-view face & eye detection and tracking
- Facial feature detection & tracking
- Face recognition, performance prediction & optimization
- Spatial, dynamic, and context modeling with Probabilistic Graphical Models

## Interests:

- Automatic facial processing and analysis
- Object detection and tracking
- Human event and activity recognition
- Probabilistic graphical models& applications

## Capabilities Sought

- Capabilities in facial recognition, system integration, and evaluation.
- Support in face detection, eye detection, facial feature detection, information fusion, and spatiotemporal modeling.
