

- Perigean Technologies LLC
- Brian Moon

- Applied Concept Mapping

- Diagrammatic method of knowledge representation
- Propositions (concept-link-concept triples)
- Semi-hierarchical morphology

- Lead editor, Applied Concept Mapping
- Created / elicited 1000s of Cmaps
 - Domains include intelligence analysis, nuclear engineering, food and consumer sciences, military operations, utilities management
 - Purposes include knowledge elicitation and representation, qualitative data analysis, lexicon development, strategic planning, rapid and accurate idea transfer

- Type of research group I seek to join
 - Use Concept Mapping as the focus task, and Concept Maps as the exosomatic products, to enable measurement and interpretation of neural activity
 - Protocol development and execution for:
 - innovative evocation of concept-related neural activity
 - interpretation of neural activity measurement
 - Novice/Expert differences
 - Domain knowledge
 - Propositional expression
