

### Who we are:

- Small, veteran-owned business started in 2001
- 42 technical staff – 17 PhD, 19 MS degrees
- Premium services in decision & risk analysis, operations research, and systems engineering
- TS facility clearance; most technical staff are cleared SCI
- Strong quals from a related DARPA program

IDI is looking to partner with a firm that can process streaming data using a variety of data extraction techniques, and can access SIGINT SMEs.

### What we do:

- Decision Support Tools and Predictive Analytics Research
- Manage or contribute to multidisciplinary projects that typically merge social and behavioral science with technical approaches
- Build probabilistic models for a wide range of problem domains (e.g., Multivariate Analysis, Bayesian Networks), using ensemble modeling
- Combine features of data content and data volume
- Combine data and SME judgments to achieve the best of each
