QEO Q&A Set 02

14. Question: Will computational capability at Oak Ridge National Laboratory be made available to the offerors, as a node to host the QEO Test and Evaluation Framework (TEF).

Answer Q14: The Government is not offering ORNL computational capabilities as requested, for offerors to the QEO BAA. However, similar to the response to question 7, the Government may give future consideration to capabilities of this kind, when, at the discretion of the Government, they may be determined to have broad value to the program.
