

CASE CHALLENGE

Credibility Assessment Standardized Evaluation

CHALLENGE OVERVIEW

The Credibility Assessment Standardized Evaluation Challenge, sponsored by the Intelligence Advanced Research Projects Activity, crowd-sourced the development of innovative methods to evaluate credibility assessment techniques and technologies.

Countless studies have tested a variety of credibility assessment techniques and have attempted to use them to rigorously determine when a source and/or a message is credible and, more specifically, when a person is lying or telling the truth. Despite the large and lengthy investment in such research, a rigorous set of valid methods that are useful in determining the credibility of a source or their information across different applications remains difficult to achieve.

The CASE Challenge solvers were asked to develop and submit ideas for novel protocols that addressed these persistent gaps. Solutions were evaluated and winners in stage 1 were announced across a variety of prize categories. The top 3 winners were selected to move on to stage 2, which will feature live pitch presentations at the CASE Challenge workshop to convince a panel of judges they have the top solution!

WORKSHOP DETAILS

The CASE Challenge Workshop will highlight the winners of the CASE Challenge and take stock of past, present and potential future developments in credibility assessment. Participants will include CASE Challenge solvers, industry representatives, academic researchers, and government stakeholders. The day will include a series of panels, speakers, and the pitch presentations from the stage 2 participants.

Please join us in this opportunity to learn from and network with experts in the credibility field!

When: **Thursday, July 18, 2019**
8:00 AM - 5:00 PM

Where: WeWork Universal North
1875 Connecticut Ave NW
10th Floor
Washington, D.C., 20009

Register online at the link below, by **Wednesday, July 10, 2019**:
