

Enduring Values. Inspired Performance.™

- SRA International
- Joseph Pemberton
- Current Teammates:
 - Context Relevant
 - Bromium

Enduring Values. Inspired Performance.™

- SRA is interested in new techniques for analyzing adversary behavior and to help identify and predict cyber attacks
- Our planned approach integrates machine learning, big data, hypervisors, microvisors, and entity extraction techniques to detect indicators of malicious cyber activity

Enduring Values. Inspired Performance.™

- SRA provides cyber security solutions to a wide range of Government customers
 - We know the limitations of existing cyber tools
 - We understand Government cyber defense needs
- Our team includes:
 - SRA entity analysis experts and tools to efficiently extract content from unstructured data
 - Big data and machine learning experts who model large, high-dimensional problem spaces efficiently

Enduring Values. Inspired Performance.™

- We are looking for academic and small business partners to augment our team capabilities:
 - Unstructured Data Analysis
 - Machine Learning
 - Big Data Analysis
 - Practical Cyber Security Experience
 - Data modeling

Enduring Values. Inspired Performance.™
