

# CATALOG

- Hyunjun Park, PhD (CEO)
- Nathaniel Roquet, PhD (CSO)
- Swapnil Bhatia, PhD (Principal Engineer)

We are developing TA 1 (Storage) :

- DNA-based massive data storage platform
- 1Tb/day (<\$1k) throughput EOY 2018

- Seed-stage startup founded September, 2016
- Proprietary encoding scheme
- Clear path to achieve throughput and cost milestones

Seeking partners in:

- **TA 2 (Retrieval)**

- Looking for low cost, high-throughput technology
- Read-length agnostic, highly error-tolerant, and compatible with various probe-based methods

- **TA 3 (Operating System)**

- Incorporation of DNA-writer module within overall data storage product architecture
