RESEARCH AREAS OF INTEREST

Levaty is a software development company primarily focused on the research and implementation of cutting-edge web and VR technologies to create state of the art application interfaces that drive productivity and innovation in mission critical areas.

We thrive on creating unique application solutions for challenges involving large data sets, both static and real-time, requiring modeling, analytics, predictive analysis, and simulation.

CORE CAPABILITIES

Application Development

Responsive Web Applications

Virtual Reality with Unity3D

Custom RESTful Service Integrations

User Experience & Graphic Design

Cloud Infrastructure

Amazon Web Services Integrations

Scalable and Robust Platforms

Database Development

RESTful API Development

Data Acquisition and Analytics

Data Modeling

Custom Data Visualizations

Aggregation and Normalization

Custom Reporting

LEVATY SEEKS:

Cleared partners with strong engineering, subject matter, or mathematical expertise in specific domains

WHO BENEFIT FROM:

Custom solutions and improved workflows to large problems through intuitive, efficient, and scalable application interfaces
